M56EXT-USB-N

External USB powered Smartlink v.92 Modem

Introduction

Offering total analogue dial-up freedom for Server, PC and Laptops the new energy efficient **M56EXT-USB-N** is the latest v.92 compliant USB bus powered Modem from the world's leading Modem manufacturer.

Being completely bus powered elevates the need for external Power Supplies and is totally Plug n' Play for leading Operating Systems including Windows®98/2000/NT/ME/XP plus total compliance with the Linux® Operating System. Ideal for legacy applications, Broadband backup or simply when there is no coverage for xDSL in the specific area the new **M56EXT-USB-N** allows complete international standards for dialup including v.92/v.90 and full duplex 56k for Data and Fax communications.

Supplied complete with USB data cable, analogue phone cable together with CD Driver disk.
