

# M8000-M

Notebook USB Webcam with LumaBright and Microphone

**480K  
Resolution**

**LumaBright  
Illumination**

## Introduction

Having trouble getting a decent image on your existing Webcam or integrated Laptop Webcam? Or do you need a truly quality portable Webcam to go in your Laptop Bag? Insixt have the answer!

The new **M8000-M** USB Colour Webcam is a high quality gloss metal enclosed Webcam which allows it to be attached to most Notebook computers and flat TFT Computer monitors.

Featuring *LumaBright* illumination, the M8000-M uses six ultra-bright LEDs to correctly illuminate you or any object that you want to focus on so that correct exposure and high frame rates can be achieved no matter what the light levels are. Unlike the best selling M8000, the new M8000-M also features a **high sensitivity microphone** for quality real-time conversations or video recording with audio capabilities.

Coupled with a fully multicoated Lens together with a pixel resolution of over 480K in full 24-bit RGB control, the M8000-M also benefits from Auto Exposure and White Balance to ensure perfect images every time!
