KVM-16001

16 Port Automatic KVM Switch, black

INTRODUCTION

Think about the following: you have 2, 3, 4, or more computers or servers in the same room or location, all with their own monitor, keyboard and mouse. If you only needed to use 1 monitor, 1 keyboard, and 1 mouse to control them all, think about how much space and money you could save! Plus, you'll never need to move around the room to use the computers or servers again; all you'll need is the Dynamode PC or Server KVM with On Screen Display and daisy chain capabilities for ease of use.

APPLICATION

► High quality multimedia, Presentation, Video Conference.
► Public broadcasting system, Education, Training.
► Demo, Stock market, Bank, Security.
